

# Elexant Connect Application

**Raychem**

## OVERVIEW

Raychem Elexant Connect is a configuration and monitoring application that is developed for Android version 11 and higher as well as iOS version 15 and higher. The software enables specific variants of the Elexant 3500i (Communicating, Current Sensing and Ground Fault Detecting), and Elexant 5010i devices to be configured and monitored via a Wireless Bluetooth® interface. Elexant Connect can be downloaded directly from the Apple App Store and Google Play Store.

## SECURITY

The application enables an Elexant 3500i or Elexant 5010i device to have Bluetooth® communication protected by password security. By default, the device is not secured. A secured device can be in a locked or unlocked state. When the device is locked, a lock icon will be visible beside the device name. The user manual provides detailed instructions on how to enable / disable Bluetooth® Security.

## FEATURES

Supported Devices	Elexant 5010i, Elexant 3500i
Device Parameters Managed	Control, Temperature, Alarms, Electrical, Maintenance, Set Up
Scan for Nearby Devices	Use of the Refresh button on the top right of the main screen scans for all available Raychem supported devices and lists them by signal strength (nearest device has the maximum signal strength).
Find a Specific Connected Device(s) (Elexant 3500i only)	Clicking on "Find Me" associated with a connected 3500i blinks the lights on the specific 3500i
Remote Management	Ability to connect via Bluetooth® and remotely manage device parameters
Bluetooth Security (Elexant 3500i, Elexant 5010i)	The application enables an Elexant 3500i or Elexant 5010i device to have Bluetooth® communication protected by password security
Firmware Update	Ability to update a specific device's firmware from a local file

## SYSTEM REQUIREMENTS

Hardware	Android Tablets, Android Phones, iOS Tablets and iOS Phones
Operating system	Android v11 & higher, iOS v15 & higher
Bluetooth® version	Bluetooth® 5.0 or higher
Bluetooth® Low Energy (BLE) Support	Yes
Supported Distance Range	Varies by device type, the Android / iOS hardware used, power settings and real world conditions from a line of sight perspective (obstacles can significantly reduce range).  For more information, refer to the data sheet of the specific device you want to connect to.
